

Usually, our lives would be normal. We could go out and see people, we could eat out, and most of all, we did not have to wear a mask. At the beginning of the pandemic I was not very scared, because it really didn't affect my life at the time. Now knowing that many people have died and gotten sick from it, I am scared. My life was normal, but now it is very far from normal.

On the weekdays, I would be at school normally. Now with the Coronavirus, only a certain amount of students can go to school, and not all of the parents chose for their kids to go to school. With Covid-19 I spend most of my time at my house. When I got the chance to go to school, I was very happy! I get to spend a couple of hours on Thursday and Friday out of the house!

During the pandemic, my mom and dad have sustained me the most. My parents have been helping me a lot with learning, because of the Coronavirus. Due to the virus, I can not just go to school on a school day and ask my teachers for help. My parents have informed me on being safe and sustained me by being caring during the Coronavirus. My teachers help also. At 8:00 am, I go to school until 12:30 pm. During that time, I can ask them for help with learning.

The school situation is way different than when Covid-19 started. I have not gotten to see my friends very often, but when I do see them it is only for a couple of hours, only 2 days a week, and only a couple of my friends are at school. I wish school was normal.

Coronavirus is very rough to live with in our daily lives. I am very sad, because we can't go out and we can get sick very easily. It is sad that some people can't go out even to the store, because they have a weakened immune system. Scientists have created a vaccine, but it did not take very long for them to make it. So, it might be dangerous.

I have animals that are my friends and because my friends can't be here right now my animals have become more involved. I can talk to them, play with them, and they understand my feelings. I have two dogs, two lizards, and one guinea pig. Our one dog, Iris, is just a giant baby even though she is an older dog! Then we have a dog named Naomi. She is crazy and addicted to water. We have 2 bearded dragons named Spike and Ariel. Spike is my lizard and he is a male. Ariel is my brother's lizard and she is female. I have a guinea pig named Squeakers. We named her that, because at the pet store she just squeaked in my parent's arms! Now back to the topic, they help me, because of Covid-19, by being my friends when my friends cannot be there. Except Naomi, because she's really crazy.

That is how "people and places informed and sustained me during this pandemic." I hope you enjoy my writing.
